ELSEVIER Journal of Virological Methods 55 (1995) 447–449

Journal of Virological Methods

Contents Volume 55

No. 1

Research Papers

M. Zerbini, D. Gibellini, M. Musiani, S. Venturoli, G. Gallinella and G. Gentilomi (Italy)
Automated detection of digoxigenin-labelled B19 parvovirus amplicons by a capture hybridization assay 1
B.J. Cohen and C.M. Bates (UK)
Evaluation of 4 commercial test kits for parvovirus B19-specific IgM 11
M.J. Slomka, R.L. Ashley, F.M. Cowan, A. Cross and D.W.G. Brown (UK, USA)
Monoclonal antibody blocking tests for the detection of HSV-1- and HSV-2-specific humoral responses: comparison with Western blot assay 27
J. Romero-Durbán, M. Cambra and N. Duran-Vila (Spain)
A simple imprint-hybridization method for detection of viroids 37
M. Buti, R. Jardí, M. Cotrina, F. Rodríguez-Frías, H. Troonen, L. Viladomiu, J.I. Esteban, R. Esteban and J. Guardia (Spain, Germany)
Hepatitis E virus infection in acute hepatitis in Spain 49
Z. Qi, D. Cui, W. Pan, C. Yu, Y. Song, H. Cui and T. Arima (China, Japan)
Synthesis and application of hepatitis E virus peptides to diagnosis 55
W.C. Koch (USA)
A synthetic parvovirus B19 capsid protein can replace viral antigen in antibody-capture enzyme immunoassays 67
K.G. Thomson, R.G. Dietzgen, A.J. Gibbs, Y.C. Tang, W. Liesack, D.S. Teakle and E. Stackebrandt (Australia)
Identification of Zucchini yellow mosaic potyvirus by RT-PCR and analysis of sequence variability 83
B. Weber, M. Moshtaghi-Boronjeni, M. Brunner, W. Preiser, M. Breiner and H.W. Doerr (Germany)
Evaluation of the reliability of 6 current anti-HIV-1/HIV-2 enzyme immunoassays 97
H.-H. Feucht, B. Zöllner and R. Laufs (Germany)
Comparison of conventional autoradiography with a new DNA enzyme immunoassay for the detection of hepatitis C virus-polymerase chain reaction amplification products 105
B. Bruchhof, O. Marquardt and P.-J. Enzmann (Germany)
Differential diagnosis of fish pathogenic rhabdoviruses by reverse transcriptase-dependent polymerase chain reaction 111
D.J. Barbara, A. Morton, N.J. Spence and A. Miller (UK)
Rapid differentiation of closely related isolates of two plant viruses by polymerase chain reaction and restriction fragment length polymorphism analysis 121
R.P. Singh, J. Kurz, G. Boiteau and G. Bernard (Canada)
Detection of potato leafroll virus in single aphids by the reverse transcription polymerase chain reaction and its potential epidemiological application 133
V. Ferre-Aubineau, B.M. Imbert-Marcille, F. Raffi, B. Besse, R. Loirat and S. Billaudel (France)
Colorimetric microtiter plate hybridization assay using monoclonal antibody for detection of an amplified human immunodeficiency virus target 145

Short Communication

F. Karlsen, H.B. Steen and J.M. Nesland (Norway)
SYBR Green I DNA staining increases the detection sensitivity of viruses by polymerase chain reaction 153

No. 2

Research Papers

E. Knapp, A. Da Câmara Machado, H. Pühringer, Q. Wang, V. Hanzer, H. Weiss, B. Weiss, H. Katinger and M. Laimer da Câmara Machado (Austria)
Localization of fruit tree viruses by immuno-tissue printing in infected shoots of *Malus* sp. and *Prunus* sp. 157
A. Pohl-Koppe, T. Raabe, S.G. Siddell and V. Ter Meulen (Germany)
Detection of human coronavirus 229E-specific antibodies using recombinant fusion proteins 175
N. Zammatteo, P. Moris, I. Alexandre, D. Vaira, J. Piette and J. Remacle (Belgium)
DNA probe hybridisation in microwells using a new bioluminescent system for the detection of PCR-amplified HIV-1 proviral DNA 185
D.J. DiStefano, S.L. Gould, S. Munshi and D.K. Robinson (USA)
Titration of human–bovine rotavirus reassortants using a tetrazolium-based colorimetric end-point dilution assay 199
N. Da Silva, R. Zardoya, G. Santurde, A. Solana and J.M. Castro (Spain)
Rapid and sensitive detection of the bovine viral diarrhea virus genome in semen 209
C. Rosa, S. Osborne, F. Garetto, S. Griva, A. Rivella, G. Calabresi, R. Guaschino and F. Bonelli (Italy)
Epitope mapping of the NS4 and NS5 gene products of hepatitis C virus and the use of a chimeric NS4-NS5 synthetic peptide for serodiagnosis 219
J.W. Kreider, N.M. Cladel, S.D. Patrick, P.A. Welsh, S.L. DiAngelo, J.M. Bower and N.D. Christensen (USA)
High efficiency induction of papillomas in vivo using recombinant cottontail rabbit papillomavirus DNA 233
S. Pizzighella, G. Pisoni, F. Bevilacqua, A. Vaona and G. Palù (Italy)
Simultaneous polymerase chain reaction detection and restriction typing for the diagnosis of human genital papillomavirus infection 245
J. Drescher and W. Verhagen (Germany)
Determination of the concentration of influenza virus antihaemagglutinin antibody molecules of the IgG class and of the equilibrium constant by use of enzyme immunoassay titres determined for graded epitope concentrations 257

Short Communications

P. Gómez-Puertas, F. Rodríguez, A. Ortega, J.M. Oviedo, C. Alonso and J.M. Escribano (Spain)
Improvement of African swine fever virus neutralization assay using recombinant viruses expressing chromogenic marker genes 271
R.F. Meyer and F. Brown (USA)
Sequence identification of antigenic variants in plaque isolates of foot-and-mouth disease virus 281

No. 3

Research Papers

S.M. Garland, T.N. Lee, R.L. Ashley, L. Corey and S.L. Sacks (Canada, USA, Australia)
Automated microneutralization: method and comparison with Western blot for type-specific detection of herpes simplex antibodies in two pregnant populations 285

J.-F. Ma, C.P. Gerba and I.L. Pepper (USA)
Increased sensitivity of poliovirus detection in tap water concentrates by reverse transcriptase-polymerase chain reaction 295
S. Tisminetzky, M. Gerotto, P. Pontisso, L. Chemello, L.E. Prescott, K.A. Rose, F. Baralle, P. Simmonds and A. Alberti (Italy, UK)
Comparison of genotyping and serotyping methods for the identification of hepatitis C virus types 303
R.K. Fujimura and L.E. Bockstahler (USA)
Polymerase chain reaction method for determining ratios of human immunodeficiency virus proviral DNA to cellular genomic DNA in brain tissues of HIV-infected patients 309
B. Grinde, T. Jonassen and H. Ushijima (Norway, Japan)
Sensitive detection of group A rotaviruses by immunomagnetic separation and reverse transcription-polymerase chain reaction 327
F. Ramiro-Ibáñez, J.M. Escribano and C. Alonso (Spain)
Application of a monoclonal antibody recognizing protein p30 to detect African swine fever virus-infected cells in peripheral blood 339
K. Suzuki, T. Saito, M. Kondo, M. Osanai, S. Watanabe, T. Kano, K. Kano and M. Imai (Japan, USA)
Poly A-linked non-isotopic microtiter plate reverse transcriptase assay for sensitive detection of clinical human immunodeficiency virus isolates 347
W. Errington, M. Steward and P.T. Emmerson (UK)
A diagnostic immunoassay for Newcastle disease virus based on the nucleocapsid protein expressed by a recombinant baculovirus 357
C.-C. Hu and S.A. Ghabrial (USA)
The conserved, hydrophilic and arginine-rich N-terminal domain of cucumovirus coat proteins contributes to their anomalous electrophoretic mobilities in sodium dodecylsulfate–polyacrylamide gels 367
F. Poisson, P. Roingeard and A. Goudeau (France)
Direct investigation of protein RNA-binding domains using digoxigenin-labelled RNAs and synthetic peptides: application to the hepatitis delta antigen 381
S. Engelbrecht and E.J. Van Rensburg (South Africa)
Detection of Southern African human immunodeficiency virus type 1 subtypes by polymerase chain reaction: evaluation of different primer pairs and conditions 391
N. Jothikumar, P. Khanna, R. Paulmurugan, S. Kamatchiammal and P. Padmanabhan (India)
A simple device for the concentration and detection of enterovirus, hepatitis E virus and rotavirus from water samples by reverse transcription-polymerase chain reaction 401
J.A. Thevasagayam, P.P.C. Mertens, J.N. Burroughs and J. Anderson (UK)
Competitive ELISA for the detection of antibodies against epizootic haemorrhagic disease of deer virus 417
B. Schunck, W. Kraft and U. Truyen (Germany)
A simple touch-down polymerase chain reaction for the detection of canine parvovirus and feline panleukopenia virus in feces 427
A. Van Belkum (Netherlands)
Low-stringency single specific primer PCR, DNA sequencing and single-strand conformation polymorphism of PCR products for identification of genetic variants of human papillomavirus type 16 435

Erratum

A.I. Klimov and N.J. Cox (USA, Russia)
Erratum to PCR restriction analysis of genome composition and stability of cold-adapted reassortant live influenza vaccines. [J. Virol. Methods 52 (1995) 41–49] 445
